Fr. Iness of Men
I have observed of my set that
there is a candor in their private
conversations with each other that
you know nothing about. In such
cases they admit their faults with
proud shame, confess they should
be better, and frequently do. I have
learned much from such intimacies
as much as from any other source.

Safety, silence and simplicity are features of the new Ford six-brake system

One of the first things you will notice when you drive the new Ford is the quick, effective, silent action of its six-brake system.

This system gives you the highest degree of safety and reliability because the four-wheel brakes are all of the mechanical, internal expanding type, with braking surfaces fully enclosed for protection against mud, water, sand, etc.

Another feature of the Ford brakes is the ease of adjustment. The four-wheel brakes are adjusted by turning a screw conveniently located on the outside of each brake plate. This screw is so adjusted that all four brakes can be set alike simply by listening to the "clicks."

The emergency or parking brakes on the new Ford require little attention. However, should they need adjustment at any time, consult your Ford dealer for prompt, courteous, and economical service. He works under close factory supervision and he has been especially trained and equipped to help you get the greatest possible use from your car.
